

New TheoRec version 2015-12-12

CHANGES

- I. The preset times on the timer will automatically change to 2, 4 and 6 minutes starting with monday 2016-01-04, in accordance with the new "Our Christian Life and Ministry"-meeting.

ADDING SONGS

1. Copy the new published songs into the folder "*songs*".
The folder "*songs*" can be found in the TheoRec installation folder
(For example: *C:\Program Files (x86)\TheoRec\songs*)
Copying the new songs requires administrator privileges.
2. The songs will be displayed automatically when the program is started the next time. Note that the numbering of the songs must be consecutive, but it is not a problem that the naming scheme of the new songs is different from those already in the "*songs*" folder. Therefore there should be no need to change the names of the files of the new songs.
3. The TheoRec Team will add the themes of new songs to each language as they become available.
Use the latest installer to get the newest translations.

Greetings,
Team TheoRec
